

CAUSE OF ACTION

2) DEFENDANT SCHEME IN GENERAL OUTLINE

The PRIMARY act of fraud is the publicly staged photos of false impression generating imagery of miscreant acts alleged to the Plaintiff but are the actual acts of the Defendants who will allege them Plaintiff acts.

(False flag acts, impersonator's who will later forge confessions ascribed to Plaintiff)

The affects scheme operated by Defendants are

A) Plaintiff is harmed socially by Defendant's acts of Criminal Harassment Under Color of Law. Miscreant behavior alleged or ascribed to Plaintiff but are Defendant falsifications are "peeping," teen or bizarre Tiara obsessions, etc., Plaintiff has no control over who is in his vicinity in public but public photos are routinely generated of bizarrely acting females in his vicinity.

B) Defendants, who were responsible for the impersonations of Plaintiff or staged photos out of the control of Plaintiff, will allow impersonators of Plaintiff to concede to blackmail payouts into Social Justice, thus enriching the Social Justice Work Organizations Plaintiff is under the mismanagement of.

In political terms, in Political Rights law, left wing social justice activists are defaming a right winger in framed acts and enriching themselves by shaking down an impersonator of the right winger, the impersonator who will concede to Social Justice workers miscreance not actually committed b Plaintiff.

3) MECHANICS, OPERATION, AND EVIDENCE OF THE SCHEME

3.1 Impersonations - vocal

Impersonations take several forms. Defendant Jim Volcelka and William Ruiz are among a series of people who in clearly duplicitous acts attempted to create a vocal record or transcript identity of being me while in my vicinity.

Defendant Jim Volelcka speaking to me: "I started to enter the military and took the ASVAB but decided to do in the private sector what the military offered to me."

In fact I myself, Plaintiff Edward Donegan took the Military Entrance Processing Center ASVAB aptitude test in Oakland, CA. I was told my IQ was very high, in fact at first cheating was checked and eliminated. I was offered Naval Intelligence - Cryptoanalyst and Fire Control in fighter jets though did not swear in. I did later did work with cryptographic equipment in private sector high tech IT work.

Defendant William Ruiz speaking to me: "It sure is nice to shower. I have not been able to shower for several weeks."

In fact I myself, Plaintiff Edward Donegan, had just rented a room in the permanent residence of William Ruiz, his condo in Capitola, CA, after I had come down from camping in mountainous territory for weeks.

3.1 Impersonations - clothing

At both Defendant Jim Volcelka's Salinas California and William Ruiz's Capitola California residence clothing was stolen from me and in the case of William Ruiz electronic photographs, recordings, and video implicate him in the theft of the clothing. These acts of Defendant Jim Volcelka and Defendant William Ruiz match unnamed parties in earlier locations who had stolen towels and other laundry from my shared laundry room in a Virginia apartment rental.

3.1 Impersonations - Automotive

In multiple gym locations motorcycles both similar to my own and not my own have been positioned to "peek inside glass windows of gymnasiums and shower areas. These are not mine but could be tied to me by description. This pattern matches a continuing RICO scheme and is consistent across locations.

My motorcycle, the one that is actually mine, can have a GoPro motorcycle cam clipped to its windscreen for scenic drives, and I have done this, though never as peeping. Still, people have against my will posed in front of my cameraless bike as though I am being caught in the act of filming unsuspecting women.

3.1 Impersonations - Motivations

In my confronting defendants Jim Volcelka and William Ruiz both cited politics for their behavior though I had not discussed politics with either. Jim Volcelka, who later identified himself as a Reagan Democrat, stated his actions were due to the fact I was a Donald Trump supporter. I suspect he really meant a Neo Nazi. Though he had been told I was a Neo Nazi he was not told I had only turned to THEM after I was racially attacked and sought so far missing support for my rights. Defendant William Ruiz cited my being "nazi scum" as the reason he was framing me though we had never discussed anything like that.

3.1 Impersonations - Forgeries

Central to a continuing racketeering enterprise joined by these parties has been a shake down of me accomplished through an impersonator of me in a tryst with a Dominatrix. Contact with, social lifestyle friendship with, and sometimes client utilization or erotic dominance art has been an open part of my public and life long lifestyle and my ties to the leather and bondage community.

This facet of my life has been exploited by racketeers who utilize dominatrices to, on behalf of social justice, shake down impersonators of me for behavior ascribed to me (but conducted by social justice activists) for genetic property which can be utilized in social justice such as gene therapies or fertilizations for gay, autistic, or retarded families.

Defendants Jim Volcelka and William Ruiz both framed me through conduct not my own though in my own shared residences with them at racketeer request such that they could also arrange themselves as me, me being blackmailed by dominatrices in scenarios in which they could sign away a white supremacist's, my property, to left wing social justice, Robin Hood style.

4) Extortion claims settled by unwanted and unneeded social justice workers, claiming to represent me on my own behalf but enriching their own work through blackmail receipt of my biological assets.

Defendant Jim Volcelka did knowingly join a RICO scheme enslaving me to unwanted and unneeded social worker assets management by knowingly assisting in the manufacture of evidence of my alleged mental incompetence.

As others have done Jim Volcelka used an undermining scheme in which anything I do as the normal person that I am is undermined as the result of an alleged retard (myself) gaining coaching from retarded children's workers.

This scheme both undermines the normalcy of myself by after-the-fact claims of coaches assisting me allegedly before my acts, and in the operation of this scheme, the presence of my own independent intelligence and IQ is hidden by those who wishes to transfer the genetic basis of the IQ which does exist in me but is denied by IQ researches who wish to manage my genome.

After I had already purchased an external motorcycle tool saddle bag for access to my tools while the camping gear was loaded on the under seat storage, defendant Jim Volcelka did knowingly undermine that I had done that simple act already by creating the public pretense I needed his motorcycle coaching on that point.

Defendant Jim Volcelka joined this longstanding racketeering enslavement scheme using the same after the fact undermining of my normal acts by coaching me to make comments on Sen. McCain's passing (death in name only) and using hillside rides for incline practice and enjoyment.

In each case he participated in the pattern of attempting to erode the fact I am and have always been a normal and independent person.

Enslavement of me to social justice retardation workers both defames a white supremacist and white separatist, myself, as well as places the social justice workers in charge of my IQ hereditary traits which are genetically transferable.

Evidence does exist on these civil suit assertions and is included in the evidence manifest. This civil suit asserts Genomic Racketeering, false claims to my genome which is associated with high IQ and useful in medical social justice work.

5) In Vitro Fertilization and The ARC of Northern Virginia (Advocacy for Retarded Children of Northern Virginia)

5.1) Beaker. An automobile used by the ARC of Northern Virginia has the license plate "Beaker" and a photo of that vanity plate is being submitted with this law suit. In Vitro, (In Glass) "test tube" babies are illegal in some countries because of sperm bank misuse and other genomic ethics issues.

The ARC of Northern Virginia claims no involvement with me other than administering a trust fund amount my brother created for me based on an inheritance from my mother Glorian Donegan. The ARC of Northern Virginia renamed the trust fund of cash assets only in to the "Family Grow Fund" and some

people associated with the ARC of Northern Virginia claim to be a part of my non-white family (of which I wish none) and other non-whites have approached me announcing they were going to have my babies as instead I have insisted absolutely never.

5.2) Blackmail locations at which ARC of Northern Virginia or other actors are allowing impersonators of me to sign actual me's DNA rights away to non-whites and gays. The locations impersonators of me or alleged appearances of me are publicly suggested are at Mistress Vesta in Sarasota Florida where "da ass raper" is associated with it, California, or other locations in Virginia.

I am not engaged in the miscreant conduct portrayed by staged photos nor the acts of impersonators, nor would I concede to any blackmail, but others are invited to do so while impersonating me for the social justice cause of my DNA rights being signed away to parties I would not allow.

Defendants Jim Volcelka both utilized locations I was asserted to be at but not at. Jim Volcelka created a September Salinas Kink Bed and Breakfast reservation for an appointment with Mistress Deja of the Gates who would likely shake down the impersonator of me over evidence manufactured as I was residing with defendant Jim Volcelka.

Defendant William Ruiz utilized a chair I had been sitting in previously and a stolen motorcycle jacket I had owned to facilitate the impersonation of me.

Outside of courts of law social workers employed by or operating in conjunction with TJ Henry or other services will create DNA authorizations.

Online available evidence identifies the presence of these impersonations and their connection to Genetech of California and In Vitro Fertilizations (the creation of Zygotes which are ovum fertilized in glass containers by sperm.)

6) GENOTOOCRACY – Genes IVF Genes for Sale

Why should retardation/austism firms blackmail smart white supremacist for IVF DNA rights of his sperm?

News article <https://www.technologyreview.com/s/610339/dna-tests-for-iq-are-coming-but-it-might-not-be-smart-to-take-one/>

DNA tests for IQ are coming, but it might not be smart to take one

Scientists have linked hundreds of genes to intelligence. One psychologist says it's time to test school kids.

by Antonio Regalado April 2, 2018

Finding the genes

To psychologists, IQ tests measure something called “*g*”—the general factor of intelligence. People who are better at math, spatial reasoning, verbal ability, and other skills that tests can measure have higher *g*.

And that’s not all. The *g* factor is strongly correlated with income, happiness, health, and life span. More *g* seems to be a good thing all around. To Plomin it’s the “omnipotent variable” in life.

It’s also highly heritable. Comparisons of twins, both identical and fraternal, separated at birth or raised together, had shown that genetics must account for more than half of intelligence—a huge effect for genes. The rest is due to your schools, your diet, and other environmental factors.

Although it’s still taboo to talk about, some medical scientists are trying to figure out how to use the polygenic intelligence scores to [pick the smartest embryo from an IVF dish](#), choose the best sperm donor, or discover fetuses at high risk for an expanded menu of cognitive disorders, including autism.

Dalton Conley, a sociologist at Princeton University, says as soon as the IQ predictions reach the double digits—something that could occur very soon—we will need to have a “serious policy debate” about such “personal eugenics.” One concern is that IVF is expensive. That could lead to a situation in which the wealthy end up using IQ-test technology to pick kids with select genes while the poor don’t, leading to an unequal society that Conley calls a “genotocracy.”

MIT Technology Review found that aspects of Plomin’s testing scenario are already happening. At least three online services, including GenePlaza and DNA Land, have started offering to quantify anyone’s genetic IQ from a spit sample.

Others are holding back. The largest company offering direct-to-consumer DNA health reports, 23andMe, says it's not telling people their brain rating out of concern the information would be poorly received.

But which specific genes are responsible? The search did not go well at first. Plomin failed to discover any links when he looked at the genomes of 7,900 children in 2010. He later became involved in a misadventure involving a Chinese sequencing company, BGI, to which he supplied the DNA of more than a thousand American geniuses. The [project got derailed](#) after news reports accused the Chinese of hatching a plot to breed "[genius babies](#)."
